

Electric Duct Heaters

TYPICAL HEATER CONSTRUCTION

TUTCO, the world's largest supplier of open coil heating elements, produces the highest quality products in the market. Our unique design allows for free flow of air around ceramics and lowest possible pressure drop through element and rack, providing forced air applications that are an environmentally sound solution for your project.

DESIGNED FOR ZERO CLEARANCE, ALL HEATERS ARE PROVIDED WITH STANDARD FEATURES:

- Fan interlock
- Ground lugs
- 105°C appliance wire
- Secondary protection
- Factory assembled and wired
- Control panel of heavy gauge corrosion resistant steel
- Removable hinged access door with latch
- Components secured to a raised plate
- Single source power entry
- Detailed wiring diagrams
- UL file E 33341
- UL file E 56530
- CSA file LR 20609

TYPICAL APPLICATIONS:

- Space heating
- Primary heating
- Secondary heating
- Auxiliary heating
- Reheating
- Multizone and variable air volume heating
